

## Co-op Oil Analysis Program

Oil analysis enables equipment owners to evaluate both the service-life of their lubricants and the condition of their equipment. This maximizes profitability by helping to safely extend drain intervals and properly schedule maintenance procedures. Oil Analyzers Inc. offers the industry's most complete analysis at a very competitive (test-for-test comparison) price. In addition, Oil Analyzers' experience with synthetic lubricants and extended drain intervals will insure the most accurate recommendations for users of AMSOIL products.

In an effort to assist T-1 certified dealers and their commercial accounts, AMSOIL INC. is pleased to announce the Co-op Oil Analysis Program. This program is designed to help qualified T-1 certified dealers reduce costs and provide their commercial accounts with state-of-the-art analysis services. This program is designed for AMSOIL T-1 certified Dealers who service commercial accounts that can now take advantage of this valuable service.

The normal Oil Analyzers Inc. kits are competitively priced at \$17.95 (non-postage), \$24.95 for postage pre-paid, and \$25.75 UPS pre-paid in the continental United States. Through the co-op program, the kits are even a greater value at only \$12.25, \$14.25, and \$19.75 respectively per kit.

For every 10 gallons of lubricant purchased by a commercial account, the account is allowed 1 kit under the co-op program. For example, 50 gallons of lubricant purchased on one order by a commercial account qualifies for up to 5 ( $50 \div 10 = 5$ ) co-op oil analysis kits. Orders from one account can also be grouped. For example, one order for 30 gallons and another for 20 gallons by the same account qualifies for 5 co-op kits provided the orders and request are made within 60 days of purchase date on invoice.

The kits will be sent directly to the commercial account unless the AMSOIL dealer can provide a purchase order number and contact name from the commercial account.

To obtain a Co-op Oil Analysis Request Form, simply call Oil Analyzers Inc. at (715) 395-0022 or send email to [info@oaitesting.com](mailto:info@oaitesting.com) Requests for co-op kits may only be submitted by T-1 certified AMSOIL Dealers or *approved* commercial accounts. Co-op kits are intended to benefit the AMSOIL Dealer for their commercial accounts that purchase the required amount of AMSOIL lubricants. Coop kits are not intended for any other testing programs.

If you have any questions regarding this program, please call us at (715) 395-0222.
