Built to Work – Built to Last

AMSOIL Super Duty Motorcycle Oil Filters

AMSOIL Spin-On SMF Filters

- Double-rolled, tuck lock seam between the heavy-duty baseplate and the filter housing protects unit against leakage during low, normal and high pressure operations
- Heavy-duty steel housing protects against burst and pulse damage
- Steel coil spring helps insure assembly integrity to help prevent unfiltered oil circulation

AMSOIL SMF Filters

- Designed for extended drain intervals and severe service
- Provides superior efficiency and greater capacity than other popular filters
- Two evenly spaced glue bead supports insure flow through entire pleat surface for longer filter life
- Fluted-rib spiral centertube resists collapse and helps prevent the circulation of unfiltered oil
- High strength heat-resistant gasket prevents leaks and insures long gasket life

AMSOIL Power Sports Air Filters

- Keep out all of the dirt, dust and mud
- Provide unsurpassed air flow and performance
- Produce more horsepower and more torque than any other filter
- Filters come apart for maximum airflow and easy cleaning.

AMSOIL Carries a Complete Line of High Quality Motorcycle Products

AMSOIL Synthetic 20W-50 and 10W-40 Motorcycle Oils

AMSOIL Synthetic 10W-40 and 20W-50 motorcycle oils give motorcyclists what they need: superior wear protection for high-stress motorcycle engines and transmissions and clutches that stay clean and deposit-free.

Motorcycle manufacturers want the best possible protection for their equipment, calling for rugged oils that exhibit high-temperature deposit control additives. AMSOIL Synthetic Motorcycle Oils are specially formulated with the best synthetic basestocks and high-performance additives to provide tough lubricating protection for all four-cycle motorcycle and ATV engines in the most demanding operations.

AMSOIL Motorcycle Oils are formulated for both water-cooled engines and the unique demands presented by air-cooled V-twin motorcycle engines, including Harley-Davidson. Conventional petroleum oils break down and oxidize when faced with high temperatures such as those experienced when idling in traffic, and this contributes to the

formation of deposits, sludge and varnish. AMSOIL withstands oil breakdown and oxidation in high temperatures, holds contaminants in suspension and keeps engines running cool and clean.

Zinc and phosphorus additives are extremely important to engines faced with high-pressure conditions, especially motorcycle engines, which typically have steep cam slopes, creating high pressure between the parts. In motorcycles, friction modifiers (prevalent in automotive oils) have been attributed to engine start failures, a rough running feel, increased fuel consumption due to higher engine stall speeds and other problems. AMSOIL 10W-40 and 20W-50 Motorcycle Oils have beefier antiwear and detergent/dispersant packages with no friction modifiers, keeping motorcycles running smoothly and efficiently, while allowing for extended drain intervals of up to three times longer than manufacturers' recommendations.

Shock Therapy Suspension Fluid

Formulated for fade-free dampening and smooth rebounds in racing and recreational applications. Controls friction and heat, reduces wear, scuffing, frictional energy loss and heat buildup and prevents fade more effectively than conventional suspension fluids. Ideal for both front forks and shocks. Available in two viscosity grades - light and medium.

Synthetic Gear Lube

Out-performs conventional petroleum gear lubes. Reduces friction for improved fuel efficiency. Gears run cooler and last longer.

Series 2000 Racing Grease

Ultimate protection for hard-driven, high-performance motorcycles. Dramatically reduces friction and wear for improved performance.

***Oil Pressure Relief Valve** (if required) assures proper oil flow at all times under all operating conditions

Heavy-Duty Case of Drawn Steel double crimped at base with rolled under seaming

Cellulose, Synthetic and Glass Blend Media provides longer life and improved efficiency

***Anti-Drainback Valve** (if required) positive action keeps dirty oil in the filter when engine is not running
